PROFESSIONAL SUMMARY

Full Stack Developer and B.Tech Information Technology student (graduating 2027) who builds and deploys end-to-end applications with React, Flask, FastAPI, and PostgreSQL. Experience spans real-time systems (Socket.IO, QR-based ordering), machine learning pipelines (scikit-learn, NLP), and production-style infrastructure with Docker, Kubernetes, and CI/CD. Skilled at secure API design, JWT authentication, role-based access control, and database design. Looking for a software engineering internship where I can ship reliable, scalable products.

SKILLS

Languages: Python, JavaScript, SQL, HTML/CSS
Frontend: React.js, Tailwind CSS, Bootstrap, Socket.IO Client
Backend: Flask, FastAPI, Node.js, REST APIs, JWT Authentication
Databases: PostgreSQL, MySQL, MongoDB, Redis
DevOps & Testing: Docker, Kubernetes, CI/CD Pipelines,
Tools: Git, GitHub, Postman, VS Code
Soft Skills: Problem-Solving, Communication, Teamwork, Time Management

PROJECTS

QR Code-Based Restaurant Order Management System | *Flask, React, PostgreSQL, Socket.IO* **Jan 2025 - May 2025**

- Built a full-stack restaurant management platform with QR code scanning for table ordering and real-time order tracking via Socket.IO, with role-based access control for customers, staff, and kitchen personnel.
- Designed a 12-table PostgreSQL schema, secured the API with JWT authentication, and optimized endpoints; deployed a production-ready system with 27 users and dashboard analytics.
- Tested core flows end to end, including menu management, order placement, and secure login. Code: github.com/bilal3898/QR-code-based-order-management-system-

AI-Powered Fake News Detection Platform | *FastAPI, React, scikit-learn, Docker, Kubernetes* **July 2025 - Dec 2025**

- Built an end-to-end fake news detection platform using FastAPI, React, and ML/NLP libraries (scikit-learn, transformers, spaCy, NLTK), with Selenium-based scraping to collect articles.
- Architected a multi-database backend (PostgreSQL, MongoDB, Redis) with Celery for background task processing, and wrote pytest tests for the core services.
- Containerized with Docker and deployed on Kubernetes with horizontal pod autoscaling, CI/CD pipeline.
- Code: github.com/bilal3898/fake-news-detection-platform

Multi-Disease Prediction System | *Python, FastAPI, React, PostgreSQL, scikit-learn* **Jan 2026 - May 2026**

- Developed a full-stack ML healthcare app that predicts 5 diseases (heart, diabetes, stroke, kidney, liver) using Random Forest models, reaching up to 91.3% accuracy on 7,000+ medical records.
- Built a FastAPI and PostgreSQL REST API serving real-time predictions in 1.2 seconds, supporting 50+ concurrent users at 99.5% uptime.
- Engineered a responsive React.js frontend with a modular architecture separating ML inference, data preprocessing, and prediction history storage.
- Code: github.com/bilal3898/Multiple-Disease-Prediction-System

EDUCATION

Sharda University - Greater Noida, India **Aug 2023 - May 2027**
Bachelor of Technology in Information Technology

CERTIFICATIONS

The Complete 2024 Web Development Bootcamp (Udemy) **May 2025 - June 2025**
Full Stack Development Bootcamp - Sharda University **May 2024 - July 2024**
Corporate Social Responsibility - NPTEL **Jul 2025 - Nov 2025**

TRAINING & PRACTICAL EXPERIENCE

Sharda University - 40 Days Training Program, Greater Noida, India

- Built backend APIs with Flask and Node.js and connected them to dynamic React frontends.
- Developed mini-projects including CRUD apps, authentication modules, and interactive dashboards.
- Collaborated using Git/GitHub with regular code reviews; strengthened DSA and problem-solving skills.
